

# Security Posture Report

Sprint 05, 2026

Generated February 23, 2026

Security Report · Vulnerability trends, control maturity, and remediation health

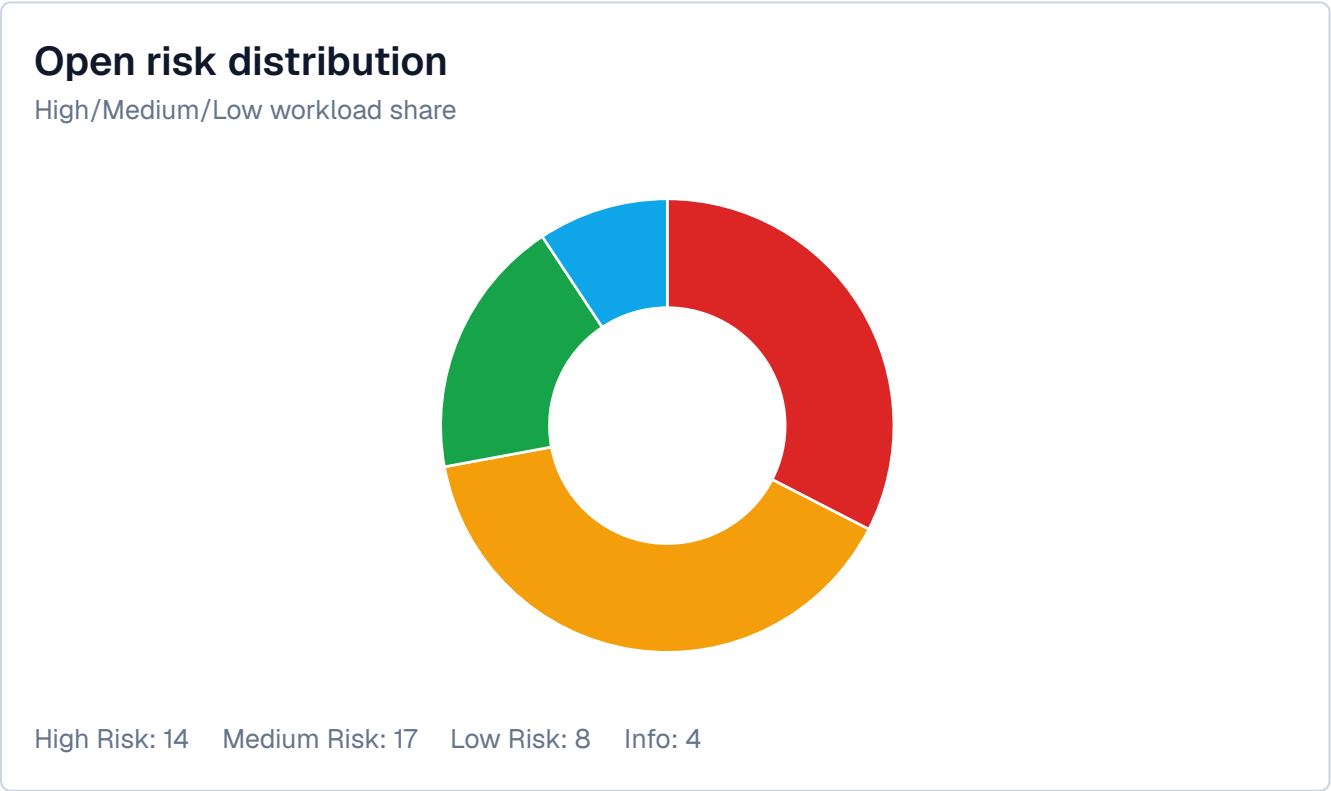

Security: Action Needed

Author: Security Engineering

## EXECUTIVE SUMMARY

|                                                                       |                                                              |
|-----------------------------------------------------------------------|--------------------------------------------------------------|
| <div>Critical Vulns</div> <div>2</div> <div>-3 from last sprint</div> | <div>Patch SLA</div> <div>92.0%</div> <div>+5.3 pts</div>    |
| <div>Open Findings</div> <div>41</div> <div>+4</div>                  | <div>Control Score</div> <div>84/100</div> <div>+2 pts</div> |

PERFORMANCE TREND

DELIVERY TABLE

| Stream              | Owner    | Status   | Progress | Risk   |
|---------------------|----------|----------|----------|--------|
| Identity Hardening  | E. Brown | On Track | 87%      | Low    |
| Secrets Rotation    | P. Nair  | At Risk  | 58%      | High   |
| Dependency Scanning | I. Shah  | On Track | 81%      | Medium |
| WAF Policy          | S. Reed  | On Track | 76%      | Low    |

## HIGHLIGHTS & NOTES

- Critical vulnerabilities reduced through mandatory patch windows.
- Secrets rotation remains the highest-risk stream and needs additional staffing.
- External penetration test scheduled for next sprint to validate fixes.
